main.c

Run ▶

```
9
0       printf("Enter the filename to open for writing \n");
1       scanf("%99s", filename);
2
3       fptr2 = fopen(filename, "w");
4
5       if (fptr2 == NULL)
6       {
7           printf("Cannot open file %s \n", filename);
8           exit(0);
9       }
0
1       c = fgetc(fptr1);
2
3       while (c != EOF)
4       {
5           fputc(c, fptr2);
6           c = fgetc(fptr1);
7       }
8
9       printf("\nContents copied to %s", filename);
0
1       fclose(fptr1);
2       fclose(fptr2);
3
4       return 0;
```

Output

```
Enter the filename to open for reading
C:\Users\ktsru\OneDrive\Desktop/source.txt
Cannot open file C:\Users\ktsru\OneDrive\Desktop/source.txt
```
